Projects

Energetic software developer with 2+ years experience. Eager to help develop modern desktop and web applications. Developed desktop applications for personnel tracking system using Java. Developed web applications using React.js, Express.js and MongoDB. Team player with management skills, and a strong user focus.

ACADEMIC PROJECTS

- Football league DB using MS SQL
- Rental car automation web site using php.
- 3D Book for kids with augmented reality on Unity.
- Emotion Analysis using wearable device in 2D Displays versus Virtual Reality Environments

OTHERS

- ZKToolBox
- Export File Helper
- ZKFlex Employee Tracking System
- Personnel website using MERN Stack.

Work experience

04/2019 – present

Software Developer
ZKSoftware, Istanbul, Turkey
Key achievements:

- Created JAVA libraries for SDK APIs of biometric products such Hikvision, Hysoon, ZKTeco.
- Developed a access control system for security devices.
- Improved performance of existing applications by modifying database architecture.
- Added a russian language to the existing products.
- I integrated other biometric device products into the software to cover more potential customers.
- Database application development.
- Developed and maintained applications passing through all stages including system analysis.
- Developed a modern web application using React.js, Express.js, MongoDB.

07/2018 – 09/2018

Software Developer Intern
ZKSoftware, Istanbul, Turkey
Key achievements:

- Helped to create a Java library for ZKTeco biometric devices using Pull SDK API.
- Developed a software to communicate between biometric devices and clients.
- Translated the software into different languages so that it could enter the foreign market.
- Fixed some script related bugs that cost performance of the software.

Education

09/2015 – 08/2019   **Computer Engineering**
Istanbul Kultur University, Istanbul, Turkey
I got the chance to earn a full scholarship given to foreign students by getting high score from entrance exam.
